SUMMARY

I am Subhrojoti Nag, a Kolkata-based enthusiast proficient in HTML, CSS, JavaScript, React, MongoDB, and Node.js, with accolades including 2nd prize in an Almabetter learning contest and the Trailblazer Award. I am seeking opportunities as a MERN Stack Developer to apply expertise in both frontend and backend development.

INTERNSHIP

MERN STACK INTERN (06/2023 - 02/2024)
AlmaBetter

- Developed and optimized web applications using React, Node.js, and MongoDB.
- Implemented best practices for security, including user authentication and data encryption.
- Served as a Subject Matter Expert (SME), offering expertise in front-end and back-end technologies.

PROJECTS

Entertainment App (MERN Stack App)
Live   GitHub
Entertainment App: A platform for searching and bookmarking movies and TV series. Features dynamic home page, dedicated sections, and user authentication. Built with React, Node.js, MongoDB, and TMDB API.
Skills: React, Tailwind CSS, Axios, JavaScript, MongoBD, Express.js, Node.js,

Real Time Weather App
Live   GitHub
Entertainment App: A platform for searching and bookmarking movies and TV series. Features dynamic home page, dedicated sections, and user authentication. Built with React, Node.js, MongoDB, and TMDB API.
Skills: React, Tailwind CSS, Axios, JavaScript, MongoBD, Express.js, Node.js,

Cryptocurrency Dashboard
Live   GitHub
This project dynamic platform for tracking and visualizing cryptocurrency data, utilizes the CoinGecko API to fetch real-time information, providing users with a seamless experience to explore the world of digital currencies.
Skills: React, Tailwind CSS, Axios, JavaScript, ChartJs

Get Youtube Subcriber Data
Live   GitHub
YT Subscriber Tracker is a Node.js app designed to fetch and display YouTube subscriber data. It offers endpoints to access subscriber info like names, subscribed channels, and individual details by ID. With simple setup and usage, it's ideal for tracking YouTube subscribers for analytics or other needs.
Skills: HTML, Express, Node.js

Amazon UI Clone
Live   GitHub
I developed a clone of the Amazon website's home page and login/signup page using HTML, CSS, and JavaScript. The project features accurate replication of Amazon's UI, along with additional functionalities such as slide functionality and horizontal scroll implemented with JavaScript.
Skills: HTML, CSS, JavaScript
